

**DRIVEWISE**

Good drivers aren't born, they're built

# 2010 PROGRAM INFORMATION AND PRICING

## TRAINING BURLINGTON SINCE 1975

**Ontario** – Barrie | Brantford | Burlington | Milton | Chatham | Sarnia | Thunder Bay | Oakville | Mississauga  
Orangeville | Fort Frances

**New Brunswick** – Moncton | Saint John | Rothesay | Fredericton

**British Columbia** – Victoria | Colwood | Kelowna | Nanaimo

# DRIVEWISE

Good drivers aren't born, they're built

Why Choose DriveWise

## Simulation Training

- . The DriveWise Safe Start Course is the **only** MTO approved Beginner Driver Training Program to **include** Virtual Reality Simulation Training within the 20 hours of classroom.
- . Well-known research concluded that after two weeks, a person remembers only 10% of what they have read. However, by presenting the same information via interactive simulation, a person will retain a remarkable 90% of what they have learned.
- . Simulation training has been used for training the Military, Police, Fire, Ambulance, Trucking, as well it is a key training component for the Aerospace Industry. This technological advancement in learning is **NOW** available for training the New Driver!
- . The DriveWise Safe Start program is exclusive to DriveWise Training Centres which now spans Canada Coast-to-Coast.

# DRIVEWISE

Good drivers aren't born, they're built

Why Choose DriveWise

## State-of-the-Art Program

- . Our experienced instructors and state of the art learning environment maximizes our students learning retention, skill development and involvement in their driver training experience.
- . DriveWise students learn through practice how to avoid or handle virtually every life threatening situation they will experience.
- . Only at DriveWise will you find the 6 Star approach to defensive driving.
- . At DriveWise our education experts update the Safe Start Beginner Driver Education program every year.
- . We teach DriveWise students the skills they need to meet the challenges of driving on today's roads through our modern blended learning environment – classroom, simulation and practical hands-on 1 on 1 in-vehicle training.

### ***Benefits of this high-tech approach:***

- o Students will experience driving at any time of the day or night and in varying weather and adverse conditions in the safety of the simulator.
- o Students will develop their driving skills for evasive maneuvers, decision -making and situational perception. (Examples include: dealing with blown tires while traveling on the freeway, deer jumping in front of the vehicle at dusk, the hazards involved in not checking mirrors and blind spots, etc...).
- o Students will safely train and make mistakes without endangering themselves, their vehicles or others.
- o Students build confidence in their driving skills for real life traffic in a multitude of situations including emergencies.
- o Students learn first hand how distractions or impairments while driving can be fatal.
- o Each student has a wireless handheld response pad, or clicker, that they are able to answer questions with. The Classroom Performance System allows every student to answer without the fear of humiliation or negative attention. Shy students can answer without being embarrassed. Eager students can answer questions without dominating the class.

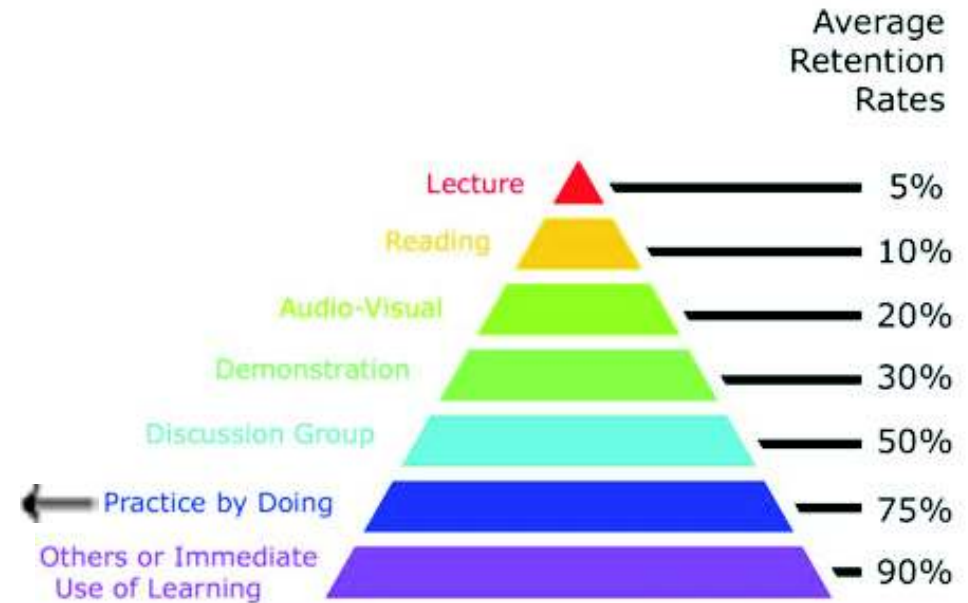

# DRIVEWISE

Good drivers aren't born, they're built

Why Choose DriveWise

## Integrated Program: In-Class and In-Car

- At DriveWise we ensure continuity between the in-class and the in-car portions of our program. What our students learn in the classroom, they will then try on the simulator and then will practice those same techniques in the car.
- Our in-class instructors teach skills like highway/freeway driving, emergency driving situations, speed management, and other collision avoidance techniques – then the students will get to use those techniques in the simulator, which creates real-life scenario's that put students in high-risk situations, while they remain perfectly safe in the classroom.
- In-car instructors will demonstrate these life-saving techniques again in-vehicle. Then our students have the opportunity to practice these skills on road with a professional by their side. That means when it happens for real - they'll know what to do!

## 2010 COURSE SCHEDULE

# 2010 COURSE SCHEDULE

Classroom Location: 2201 Brant Street , Ground Level, North side of building beside Brant Animal Clinic. South East corner of Upper Middle Road and Brant Street.

Z771012	July 19,20,21,22	Mon, Tues, Wed, Thurs- 4 days 9:30am to 3:45pm	
Z771013	Aug 9,10,11,12	Mon, Tues, Wed, Thurs- 4 days 9:30am to 3:45pm	
Z771014	Aug 23,24,25,26	Mon, Tues, Wed, Thurs- 4 days 9:30am to 3:45pm	
Z771015	Aug 30,31 Sept 1,2	Mon, Tues, Wed, Thurs- 4 days 9:30am to 3:45pm	
Z771016	Sept 18,19,25,26	Sat & Sun- 2 weekends 9:30am to 3:45pm	
Z771017	Oct 16,23,30 Nov 6	4 Saturdays 9:30am to 3:45pm	
Z771018	Oct 25th	Mon & Wed evenings - 4 weeks - Mon 6:00pm to 8:15pm & Wed 6:00pm to 9:15	
Z771019	Nov 13,14,20,21	Sat & Sun- 2 weekends 9:30am to 3:45pm	
Z771020	Dec 4,5,11,12	Sat & Sun- 2 weekends 9:30am to 3:45pm	
Z771021	Dec 18,19,20,21	**XMAS COURSE** Sat,Sun,Mon,Tues 4 days 9:30am to 3:45pm	
Z771022	Dec 27,28,29,30	**XMAS COURSE** Mon,Tues,Wed,Thurs- 4 days 9:30am to 3:45pm	

### Lesson #1

#### Star 1

- . Introduction to the vehicle/controls/blind spots/blind areas
- . Circle Check/brake/accelerator/steering
- . Turns in a residential area
- . Curb Judgment

### Lesson #2

#### Star 2

- . Review of **Lesson #1**
- . Right of Way
- . Stop positions for small intersections
- . Scanning intersections/eye lead time/mirror usage

### Lesson #3

#### Star 3

- . Review of **Lesson #2**
- . Backing/Reversing
- . Parking: Stall only
- . Spotting problems/following distances/space/lane changes

### Lesson #4

- . Review
- . Parking: Hill Park/Parallel Parking
- . 3 point turns

### Lesson #5

#### Star 4 & 5

- . Review
- . Driving in Heavier Traffic
- . Left Turn at Traffic Lights - "S" Approach
- . Point of No Return

### Lesson #6

- . Review
- . One-Way Streets
- . Right of Way and Turning Positions for One -Way streets
- . Dealing with large intersections

### Lesson #7

#### Star 6

- . Highway/Freeway Driving
- . Merging on and off ramps safely

### Lesson #8

- . Review
- . Gravel Shoulder Recovery
- . Head-on Collision Avoidance

### Lesson #9

- . Review
- . Emergency Maneuvers
  - o Emergency Braking
  - o Emergency Steering
  - o Rear Crash Avoidance
- . Re-start stalled engine
- . Dealing with Brake Failure

### Lesson #10

- . Preparation and review prior to Mock Road Test
- . Tips and practice points will be highlighted in preparation for **Lesson #11**

### Lesson #11

- . Defensive Assessment

### Lesson #12

- . General Review emphasis placed on areas needing improvement as per Mock Road Test in **Lesson #11**
- . Polishing Skills

### Lesson #13

- . Simulated Road Test
- . Road Test Tips

**Classroom**

Traffic Laws  
Traffic Control Devices  
Vehicle Control  
Adverse Conditions  
Collision Avoidance/Emergency Manoeuvres  
Cooperative Driving  
6 Star Approach to Collision Free Driving  
Driving at Intersections  
Highway/Freeway  
Railway Crossings  
ABS  
Collision Analysis  
Driving Attitudes  
Handling Emergencies  
What To do at the Scene of a Crash  
Adjusting Driving Behavior to Driving Conditions  
Seeing is Perceiving  
Emotional Control  
Responsible and Informed Decision Making  
Responding to Emergency Situations  
Leadership in Promoting Safety  
Safe and Proper Observation Skills

**Classroom**

Common Factors for New Drivers  
Perception and Risk Management  
Effective decision making  
Managing Distractions  
Managing Attention  
Consequences of Impaired Driving  
Auto Smart

**Simulation Lab**

Basic Vehicle Components  
Vehicle Handling/Turns  
Rules of the Road  
Right of Way  
Following Distance  
Cooperative Driving on Highways/Freeways  
Emergency Manoeuvres  
Adverse Conditions and Night Driving  
Highway/Freeway Driving in Winter Conditions  
Distracted Driving  
Impaired Driving

## 2010 AUTOMATIC TRANSMISSION PROGRAMS

### Automatic Transmission: Course Type: Basic

#### Our Signature Program

The DriveWise Safe Start beginner driver education course includes:

- 10 hours of private in-car training sessions
- 10 hours HomeLink
- 20 hours of classroom training including:
- 6 hours of hands on driver training simulation labs, student workbook
- a blended learning approach with electronic presentation & testing
- Free Co-Driver Seminar

799.00 + HST (\$103.87) Total \$902.87

Terms	1	2	3	4	5	6	7	8	Total
Full	\$902.87								\$902.87
Basic	\$300.00	\$200.96	\$200.96	\$200.96					\$902.87
Easy Pay	\$259.87	\$99.00	\$99.00	\$99.00	\$99.00	\$99.00	\$99.00	\$99.00	\$952.87

### Automatic Transmission: Course Type: Basic (Out of Town Pick Up)

The DriveWise Safe Start beginner driver education course includes:

- 13 hours of private in-car training sessions
- 10 hours HomeLink
- 20 hours of classroom training including:
- 6 hours of hands on driver training simulation labs, student workbook
- a blended learning approach with electronic presentation & testing
- 2 additional 45 minute in-car training sessions (covering the skills of parking and freeway driving – in preparation for the G1 exit road test)
- Free Co-Driver Seminar

879.00 + HST (\$114.27) Total \$993.27

Terms	1	2	3	4	5	6	7	8	Total
Full	\$993.27								\$993.27
Basic	\$300.00	\$231.09	\$231.09	\$231.09					\$993.27
Easy Pay	\$350.27	\$99.00	\$99.00	\$99.00	\$99.00	\$99.00	\$99.00	\$99.00	\$1043.27
